

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	19 September 2022
Team ID	PNT2022TMID29453
Project Name	Web Phishing Detection
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Brainstorm & Idea Prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Group ideas

There are many ways to group ideas while brainstorming. Here are a few ideas to get you started. Overall, sticky notes have been prepared, just print and stick them on the wall. If a sticky note is too big, you can cut it into smaller pieces. If you don't want to print, you can use a digital version of this template.

Web Phishing

Web phishing is a type of cyber attack where the attacker impersonates a legitimate website to steal sensitive information from the user. This can be done by creating a fake website that looks like the real one, or by redirecting the user to a malicious website. Web phishing is a common type of cyber attack, and it can be used to steal a wide range of information, including passwords, credit card numbers, and social security numbers.
